MOBILE

Wireless Mobile

CYBEX WIRELESS MOBILE SOLUTION INCLUDES APPLICATIONS FOR WINDOWS MOBILE DEVICES. EFFICENT BARCODE SCANNING AND INVENTORY COUNTING ARE COMMUNICATED DIRECTLY TO THE HEAD OFFICE

Wireless Mobile solution is designed to improve user productivity and efficiency. Wireless devices sync directly to Cybex modules including Transfers, Receiving, Shipping and Physical Inventory Count.

Feature		Key Benefits
Automated Transfer		Information on devices is quickly transmitted to the Head Office database eliminating manual tasks and employee errors
Flexibility		Seamlessly integrated with the Head Office, Cybex applications can be downloaded on mobile devices allowing users to perform required tasks without being tied to their desk
Inventory Transfers		User can quickly and easily ship or receive with confidence by scanning items as soon as they arrive at the distribution center
Track Inventory		Users can physically scan in inventory to be shipped or just before it is packed for shipping with the convenience of mobile barcode data terminals
Improved Inventory Count		Increase efficiency and improve accuracy during inventory counts by quickly scanning items without having to physically handle merchandise
Productivity		Processes are streamlined with mobile devices- time and cost of task completion is reduced, rework is eliminated and accuracy is improved
Integrated with Windows		Compatible with all currently supported Microsoft Windows workstations and servers
